

After Visit Summary

Lakeside Family Medicine

Patient Rosa Ferreira
Date of birth 03/14/1947
Visit date September 15, 2026
Provider Adaeze Okafor, MD (Family Medicine)
Visit type Office visit, blood pressure follow-up

Vital signs

Blood pressure	Pulse	Weight	Temperature
146/84	72	151 lb	98.0 F

Reason for visit

Blood pressure follow-up. Cough has resolved. Home readings reviewed: mostly 140s over 80s. Patient reports mild swelling of both ankles by evening, better in the morning. Patient also asks about a thickened toenail on the right foot that is hard to trim.

Assessment and plan

- **High blood pressure**, improved but not at goal.
- Continue amlodipine 5 mg daily.
- **START** hydrochlorothiazide 12.5 mg, one tablet by mouth once daily in the morning.
- Labs ordered today. Results will be released to the portal when available.
- **Ankle swelling**: discussed. Elevate legs in the evening. Monitor.
- **Toenail**: referral placed to Podiatry for routine nail care.
- Follow up in 3 months.

Your medications after this visit

Medication	How to take	Change today
Hydrochlorothiazide 12.5 mg tablet	1 tablet by mouth once daily	NEW
Amlodipine 5 mg tablet	1 tablet by mouth once daily	No change
Lisinopril 10 mg tablet	1 tablet by mouth once daily	No change
Atorvastatin 20 mg tablet	1 tablet by mouth at bedtime	No change
Vitamin D3 1000 unit capsule	1 capsule by mouth once daily	No change
Acetaminophen 500 mg tablet	1 to 2 tablets every 6 hours as needed for pain	No change

Instructions

Hydrochlorothiazide is a water pill. You may urinate more often for the first few days. Take it in the morning. Keep checking your blood pressure at home.

Referrals

Podiatry, routine. The referral office will call you to schedule.
